The road to enterprise mobility

Enable users to work flexibly and securely while you stay in control

Users need swift, secure and appropriate access to your IT systems to do their jobs. You need to control it all. With strategy and policies in place to adopt cloud and manage devices, you can give users access to the data they need and the ability to work flexibly. **That's enterprise mobility. But how do you get it?**

Organizations can benefit financially and functionally from a move to the cloud.

Manage hybrid identity with Azure AD Premium

Protect your information with Azure Rights Management

Device, app and data management with Intune

So if you're feeling this

pain

- **I don't know where to start**
- **Fear of data loss and inappropriate access**
- **Many user devices outside my control**
- **No in-house expertise**
- **How much is it going to cost?**
- **Too many passwords**
- **What if devices get lost or stolen?**
- **Our systems don't give my users the flexibility they demand**
- **Constrained by regulations**

and you'd like to

gain

- **A clear vision and strategy**
- **Predictable reduced costs and timeline**
- **Expert advice, knowledge and support**
- **A way to flexibly manage and control my users' devices**
- **In-house expertise**
- **See it working smoothly before broad adoption**
- **I need to convince my stakeholders**
- **Competitive advantage**
- **Security! I need a good night's sleep**

Trust Oxford Computer Group to guide you safely on the road to enterprise mobility. Journey with us in four clear steps: 1. workshop 2. pilot 3. implementation 4. managed support.

Mobile is the new normal

Mobile devices are empowering users and increasing productivity. They have changed the relationship between IT and users. For organizations like yours to reap the many benefits of enterprise mobility quickly, efficiently and securely, you need to design and implement an appropriate enterprise mobility solution. Let us guide you. There are four steps on the journey.

Workshop	Pilot	Implement	Manage
Step 1 **DISCOVER**	**Step 2** **SEE IT IN ACTION**	**Step 3** **MAKE IT HAPPEN**	**Step 4** **KEEP IT HEALTHY**
Days*	Weeks*	Weeks/Months*	As long as you wish*
We work with your team to discover what you need to achieve and understand your business drivers	We build a pilot so you can feel the solution working in practice in real time, in three dimensions. Don't imagine it, test drive it!	Only when you're happy with the pilot solution will we build it and roll it out.	Keep your solution healthy with regular updates. We'll work with you to manage changes and support you when you need us
Discover what's possible. Get the facts!	Learn how your solution works and makes things swifter and more efficient	We'll equip your team with the knowledge to manage your solution day-to-day	Learn how to manage and maintain your solution long-term - or let us help
Define value	Measure value	Deliver value	Monitor and track value
Save yourself hassle - get unbiased information	Save time explaning to others how it works - show them	Save money - see how cost-effective your solution is	Save effort - let us manage it for you

*Time taken for each step depends on the size and complexity of your organization.

Come with us. The road ahead is clear

Take your first steps on the road to enterprise mobility today.
