

Identity and Access

Know who has access to what, automate provisioning processes, increase productivity, and meet regulatory and compliance requirements.

“ This project will set us up for the future, protect our documents, our people, and everything that’s important to us. It’s great working with OCG because literally, you wrote the book on this stuff! - *OCG customer in the social care sector* ”

- ✓ I want my business to be more efficient and to automate identity lifecycle tasks.
- ✓ I want all our systems, services, and data to be joined up.
- ✓ I want to stop wasting time and money on routine administrative tasks.
- ✓ I want to know who has unauthorized access to our corporate data.
- ✓ I want our users to be able to sign on just once and to reset their own passwords.
- ✓ I want to meet statutory requirements more cost-effectively.
- ✓ I want our users to have appropriate, secure, and timely access to the systems and data they need, and from their choice of device.
- ✓ I want our Active Directory to provide more effective support for our current business requirements.

A carefully designed and implemented identity platform will enable you to achieve all the above - and more!

What we can do for you

- **Identity Strategy/Roadmap** Guidance on identity management strategies to keep your enterprise competitive and safe.
- **User Lifecycle Management** Drive efficiencies in time, cost, and accuracy in on-boarding and off-boarding.
- **Active Directory Remediation and Consolidation** Update your AD structure to reflect your current business and security needs, instead of obsolete requirements.
- **Device Lifecycle Management** You can’t prase your users from their devices, so integrate your identities and devices.
- **IoT Strategy/Roadmap** As the Identity of Things becomes increasingly important, we will ensure that it is included in your identity strategy.
- **Connection Solutions for a Wide Range of Systems** From ERP to HR, our customizable connectors streamline user lifecycle management.

What you get

- Efficient management of digital identities.
- Appropriate, secure and convenient access to data and systems for staff.
- Reduced costs.
- Automated administrative processes.
- Compliance with statutory regulations.
- Increased productivity through single sign-on and self-service features.
- Ability to take on new business or technical initiatives such as cloud enablement and device management - with ease.

Why choose Oxford Computer Group?

- **Track record** We have designed and implemented identity and access solutions to more than 800 organizations large and small in the US, UK, and Germany for more than a decade, including most Fortune 500 customers, and 57 state agencies.
- **Award-winning** We have won Microsoft’s Partner of the Year award seven times, and been finalist ten times.
- **Technical expertise** OCG’s specialist team of architects and consultants have expertise as deep as it is broad and follow industry best practices.
- **In the know** Our close working relationship with Microsoft product group managers and engineers means we are always up to date with technical developments.
- **Value** Much of our business is from repeat customers who value our service, pricing and long-term commitment.
