

Is your organization making the most of **Office 365 for security and efficiency?**

A photograph showing the backs of several people sitting around a wooden conference table, engaged in a meeting. Laptops and a glass of water are visible on the table.

Get Expert Answers Fast with an Office 365 Envisioning Workshop

With an Office 365 Envisioning Workshop, Oxford Computer Group (OCG) will lay out a scalable, robust, and secure solution to better protect your data, brand, and users.

The workshop includes a deep dive into strategies and deployment options for Office 365, exploring both cloud and hybrid environments. The end result is a recommended approach to deployment and clearly defined next steps.

An Office 365 Envisioning Workshop will help you implement the latest security features, ensure access is controlled across the enterprise, and stay in compliance

Start with an Oxford Computer Group Office 365 Envisioning Workshop.

Through a combination of on-site workshops, discussions, interviews and analysis, our highly experienced consultants will:

- Gather detailed information about your IT infrastructure, and identify how to meet your long term goals based upon the business and/or technical drivers
- Review the strategies and deployment options for Office 365, exploring both cloud and hybrid environments
- Present a roadmap for deployment with clearly defined next steps

Sound Familiar?

- We're struggling to provide employees with secure access to organizational data from the iOS, Android, and Windows devices they use
- Our current solutions aren't providing the level of collaboration and communication that is necessary for our fast-paced environment
- We have partners, contractors, or clients who we need to be able to share content with easily and securely
- We have some users still using Exchange on-premises and can't figure out how to get everyone migrated to the cloud efficiently
- Our organization has recently been part of a merger and we need to get all users communicating efficiently and securely
- We use on-premises SharePoint as well as Office 365 and we need help integrating the security model

What Does Our Standard* Office 365 Envisioning Workshop Include?

Stage 1: On-site Workshops, Interviews and Discussions (up to 5 days)

- Through workshops and interviews, identify specific concerns and objectives, and projects already underway
- Outline the services available in Office 365 and explore your current environment to make recommendations based upon high-level data assessment

Stage 2: Detailed Report and Recommendations

- **Migration Strategy:** outline the adoption options available and a migration strategy that will work for your organization
- **Licensing:** explain the Microsoft licensing and various SKUs, and determine which license plan will work best for your organization
- **Authentication:** determine robust and secure authentication methodology for your Office 365 implementation
- **Landscape Changes and Administration:** provide guidance for your helpdesk and administration staff on long-term care and maintenance, including an overview of data and identity security requirements

Stage 3: Briefing Session

- Detailed presentation of report and executive briefing
- Discussion of next steps

***Our standard package can be customized to suit your needs. Please contact us to discuss options!**

Why Choose Oxford Computer Group?

Oxford Computer Group has deployed or migrated over 4 million seats of Office 365, and we are a trusted Microsoft partner in delivering cloud services. Why choose anyone else to help you build your vision for Office 365?

- **We started winning Microsoft awards in 1991** – and are still winning them – in the categories of Identity, Security, Enterprise Mobility and Training
- We support Microsoft's commitment to **cloud platform security**, and extend that commitment to our customers
- We are a **Microsoft Gold Partner** in the Devices and Deployment and Enterprise Mobility categories, and a Microsoft Silver Partner in the Cloud Platform category
- We have created **innovative and cost-effective solutions** for thousands of enterprises, in every sector, worldwide

“ We chose Oxford Computer Group because they are the only game in town in my opinion.

We continue to use OCG because we know the people, we like the people, they're very knowledgeable, and they are just a really great company to work with. ”

IT Infrastructure Manager, The Walsh Group
