

IT Solutions for Healthcare Organizations

EMR Business Integrations, Identity and Device Management, Automated Account Provisioning, Identity and Application Security, Cloud Enablement

Oxford Computer Group (OCG) has a long and impressive track record of building and deploying successful on-premises, hybrid, and cloud-based identity and security solutions in the healthcare industry.

In today's fast-paced and mobile world, ensuring that doctors and staff have secure and appropriate access to data when and where they need it is essential. OCG's identity management solutions facilitate collaboration and efficiency among staff to improve the quality of patient care, save valuable time, and save resources.

We make technology work for you

Organizations in the healthcare industry are constantly threatened by cybersecurity attacks and breaches. OCG implements solutions that help ensure sensitive data is protected and in full compliance with HIPAA and company policies. We also implement solutions for data and access governance and reporting that make audits a breeze.

Service offerings include:

- Azure AD deployments and Office 365 integrations & migrations
- Identity management design and implementation using FIM/MIM for account provisioning and de-provisioning
- Single sign-on and multi-factor authentication
- Integration with healthcare SaaS applications such as McKesson, Cerner, and Epic
- Mobile device management and deployment using Intune
- Data security design and deployment using Azure RMS
- Identity governance, RBAC, SoD, and other governance consulting

Recent OCG engagements in healthcare include:

Multi-billion US-based surgical services company with 40+ facilities

- Implemented Identity Management
- Implemented FIM and FIM portal to support HIPAA compliance
- Integrated user account provisioning for Office 365

Worldwide multi-billion medical devices company

- Automated account provisioning for contractors
- Replaced the paper-based compliance system that supported the contractors with automated system
- Future phases to use AADP and MFA to support B2B relationships

Multi-billion US healthcare provider system with more than 900 locations and 60,000 staff

- Compliance-driven deployment of MFA for all users logging on to email
- MFA for Office 365 kiosk-based users
- Next phase to provide Azure MFA company-wide

Multi-billion US healthcare provider with facilities and partners throughout the US

- Compliance-driven deployment of MFA after phishing attacks on one of their partners
- MFA deployment driven by acquisition activity
- MFA for remote access driven by federal requirements

Merger of two large US hospitals with 30,000+ employees

- Swiftly united and integrated two disparate systems into one platform and cloud-based identity management system
- Implemented Office 365, MFA, and single-sign on

IT Solutions for Healthcare Organizations

How we do it

Technology

We use a range of Microsoft technologies in our solutions: Enterprise Mobility + Security, FIM/MIM, Active Directory, Azure, Azure AD, Intune, System Center, Windows 10, Office 365, and more.

Our knowledge of these technologies is such that we can configure them to work alongside customers' existing infrastructure and legacy systems.

Our expertise

Our people combine bright, technical, and business brains with a wealth of experience. Our team have industry-standard qualifications and are recognized as experts in our field.

We work closely with the Microsoft Product Groups and test Microsoft products for Microsoft before they go to market. We sit on panels that develop technical roadmaps and participate in Rapid Deployment Programs.

Our approach

We care about our customers' projects because once we're on board, it's our project, too. We listen carefully to understand precisely what it is our customers need to achieve.

Our can-do attitude, personal service, and 100% commitment means that working closely together, we can define the problem and find the solution.

We are a safe pair of hands

Our reputation

OCG is trusted all over the world for our no-nonsense approach to complex IT problems. It's all very well us telling you how good we are, but so much better if you can see what our customers and partners say about us.

Check out oxfordcomputergroup.com for customer testimonials, case studies and endorsements.

"There is no partner in the world my team works more closely with than Oxford Computer Group."

Alex Simons, Director of Program Management, Active Directory, Microsoft

About Oxford Computer Group

In the IT world, change is a given. Moving to the cloud, enabling devices, rolling out applications – whatever organizations are doing – they must ensure that the right people access the right corporate data from the devices and locations that they choose.

That's where we come in: helping our customers stay in control with identity management, device management, and information protection.
