

Microsoft Security Immersion Event: Into the Breach

Are you ready to test your team's cybersecurity skills in a fun, interactive one-day experience?

Into the Breach launches attendees into an intense, real-world security breach simulation. Get hands-on experience with Microsoft products and test your team's knowledge.

Players take on the role of a security analysts assisting on a simulated attack. They'll apply their knowledge of Microsoft 365 Defender and Microsoft Sentinel to complete a set of tasks, competing for bragging rights as they move up the leaderboard.

Into the Breach shows how Microsoft Threat Protection solutions help you:

Address threats more efficiently and effectively.

Use security automation to detect, investigate and respond to threats using automated investigations and self-healing capabilities.

Use integrated, automated, extended detection and response (XDR) to increase efficiency and effectiveness with Microsoft Defender.

Use advanced hunting features to explore raw data across all security pillars and locate threat indicators.

Stay secure against threats to identity, endpoints, data, apps and infrastructure.

View alerts and remediate across your Microsoft 365 environment in a single dashboard.

Get end-to-end insights across the entire organization with the Microsoft Sentinel cloud-native SIEM.

Why Oxford Computer Group?

When it comes to security, you need an experienced partner.

OCG has been a go-to Microsoft partner for identity and security since 2003. Our goal is to ensure our customer's Microsoft investments are fully integrated into their security, compliance and governance strategies.
