**Microsoft**

Microsoft Security Immersion Event:
Shadow Hunter

Are you ready to test your team's cybersecurity skills in a fun, interactive one-day experience?

Shadow Hunter launches attendees into an intense, real-world security breach simulation. Get hands-on experience with Microsoft products and test your team's knowledge.

The Mission: Players take on the role of a security analysts to find the attacker that has gained network access through a security camera in your office's building. Monitor risky workloads that may not be visibly there, such as Enterprise IoT and Hybrid cloud workloads. At the end of the day, protect workloads running on Azure, hybrid, and multi-cloud to save the day..

Shadow Hunter shows how Microsoft Defender for Cloud solutions help you:

Address threats more efficiently and effectively.

Use Defender for Cloud to check the security posture of your cloud resources

Use Defender for Cloud to check the security posture of your cloud resources

Protects workloads running in Azure, hybrid, and multi-cloud Linux and Windows environments

Secure multi-cloud environment

View alerts and remediate across your Microsoft 365 environment in a single dashboard.

Get end-to-end insights across the entire organization with the Microsoft Sentinel cloud-native SIEM.

Why Oxford Computer Group?

When it comes to security, you need an experienced partner.

OCG has been a go-to Microsoft partner for identity and security since 2003. Our goal is to ensure our customer's Microsoft investments are fully integrated into their security, compliance and governance strategies.
